

TATTOO

REMOVAL

WE CAN PERMANENTLY REMOVE YOUR TATTOO USING
STATE OF THE ART Q SWITCHED ND YAG LASER

DESIGNED EXCLUSIVELY FOR THE REMOVAL OF TATTOOS
 ALL TATTOO REMOVAL PROCEDURES ARE PERFORMED BY
JENNIFER BUEHRLE RN CLT

LUCKY 13 TATTOO REMOVAL
 1800 WEST BROAD STREET
 RICHMOND VA 23220

AFFORDABLE PRICING

WHAT ARE THE BENEFITS OF LASER TATTOO REMOVAL?

DURING LASER TATTOO REMOVAL, THE LASER IS USED TO SELECTIVELY TARGET AND DESTROY THE TATTOO WITHOUT DAMAGING THE SURROUNDING TISSUE, WHICH GREATLY DECREASES SCARRING.

LASERS HAVE DIFFERING WAVELENGTHS AND PULSE DURRATIONS, AND DIFFERENT LASER BEAMS ARE ABSORBED BY SPECIFIC COLORS ALLOWING THE MEDICAL PRACTITIONER TO CHOOSE THE PRECISE COMBINATION OF LASERS FOR THE DEPTH AND COLOR OF A PARTICULAR TATTOO AS WELL AS FOR MULTI-COLORED TATTOOS.

AFTER TREATMENT THE SKIN IS MORE UNIFORM AND NATURAL IN APPEARANCE. ALTHOUGH SOME CHANGES IN SKIN TEXTURE AND COLOR MAY BE UNAVOIDABLE.

HOW IS LASER TATTOO REMOVAL PERFORMED?

THE R.N. WILL FIRST CLEANSE THE AREA ON AND AROUND THE TATTOO TO REMOVE OILS ON THE SKIN. YOU SHOULD EXPECT SOME PAIN DURING THE TREATMENT. THIS IS MOST OFTEN DESCRIBED AS A BURNING OR STINGING SENSATION. A ZIMMER CRYO 5 CHILLER (HELPS NUMB THE SKIN USING COLD AIR), WILL BE USED BEFORE, DURING, AND AFTER TREATMENT TO HELP MINIMIZE DISCOMFORT. DURING THE PROCEDURE YOU'LL FEEL INTENSE EMISSIONS OF LIGHT PENETRATE THE TATTOOED AREA.

HOW LONG DOES THE PROCEDURE TAKE?

ON AVERAGE, EACH LASER TREATMENT TAKES FROM TEN TO TWENTY MINUTES. SEVERAL TREATMENTS ARE NEEDED TO ACHIEVE THE DESIRED RESULTS...THE NUMBER WILL VARY DEPENDING ON THE DEPTH AND COLOR OF THE TATTOO, BUT TWO TO TEN TREATMENTS FOR ONE TATTOO ARE NOT UNCOMMON. YOU MUST ALLOW AT LEAST 6 TO 8 WEEKS BETWEEN TREATMENTS, SO BE PREPARED TO COMMIT A SUBSTANTIAL AMOUNT OF TIME TO THE PROCESS, BUT THE RESULTS ARE NEAR PERFECT

WHAT CAN I EXPECT AFTER TATTOO REMOVAL?

THE AREA MAY BE RED, AS IF MILDLY SUNBURNED, FOR SEVERAL WEEKS. THERE MAY BE SOME BRUISING AND WITH DEEPER TATTOOS BLEEDING IS NOT UNCOMMON. THE AREA MAY BE TREATED WITH AN ANTIBIOTIC OINTMENT AND A BANDAGE APPLIED.

RECOVERY TIMES DEPEND ON THE EXTENT OF THE TREATED AREA AND THE INDIVIDUALS CAPACITY TO HEAL. REDNESS AND SENSITIVITY MAY CONTINUE FOR SEVERAL WEEKS, AND THERE MAY BE DISCOLORATION AND A CHANGE IN SKIN TEXTURE IN THE AREA, WHICH WILL GRADUALLY IMPROVE.

YOU SHOULD AVOID EXPOSING THE TREATED AREA TO THE SUN, AS THIS MAY RETARD HEALING. YOU WILL NOTICE SIGNIFICANT RESULTS AFTER SEVERAL TREATMENTS HAVE BEEN COMPLETED. MOST PEOPLE ARE VERY SATISFIED WITH THE PIGMENT REMOVAL ACHIEVED THROUGH LASER TREATMENT. IT IS IMPORTANT TO REMEMBER, HOWEVER, THAT YOUR SKIN MAY NEVER LOOK AS PERFECT AS IT DID BEFORE YOU HAD THE TATTOO, EVEN THOUGH THE TATTOOED PIGMENT HAS BEEN REMOVED.

SEVERAL ADDITIONAL FACTORS CAN AFFECT THE LONG-TERM OUTCOME OF YOUR TREATMENT. OLDER TATTOOS ARE EASIER TO REMOVE THAN NEWER ONES. TATTOOS APPLIED BY AMATEURS ARE EASIER TO REMOVE THAN THOSE APPLIED BY PROFESSIONALS. CERTAIN PIGMENTS ARE EASIER TO REMOVE, WITH FLOURESCENT COLORS BEING THE LESS RESPONSIVE TO TREATMENT. BLACK IS THE EASIEST TO REMOVE WHILE GREEN AND YELLOW ARE THE HARDEST. THERE IS ALWAYS A RISK OF THE SKIN BEING HYPOPIGMENTED (LIGHTER COLOR) IN THAT AREA. THE TYPE OF INK USED MAY ALSO AFFECT THE RESULTS, SINCE SOME INKS CREATE A PARADOXICAL REACTION, CAUSING THE SKIN TO BECOME DARKER INSTEAD OF LIGHTER.

WHAT WILL HAPPEN AT THE INITIAL CONSULTATION?

DURING THE CONSULTATION, THE REGISTERED NURSE WILL ADVISE YOU ON WHAT TO EXPECT FROM LASER TREATMENT. WILL EXPLAIN THE DIFFERENT OPTIONS AVAILABLE TO YOU. THE PROCEDURE ITSELF, AND ITS RISKS AND LIMITATIONS. YOUR MEDICAL PRACTITIONER WILL BEGIN WITH A COMPLETE MEDICAL HISTORY AND AN EXAMINATION OF YOUR TATTOO AND YOUR OVERALL SKIN TONE AND QUALITY, SIZE, STYLE, COLOR AND LOCATION OF THE TATTOO, AS WELL AS THE COLOR AND TEXTURE OF YOUR SKIN. WILL DETERMINE THE TYPE OF LASER TREATMENT RECOMMENDED. WE WILL ALSO WANT TO KNOW WHEN, WHERE, AND BY WHOM YOUR TATTOO WAS APPLIED, AS THESE FACTORS TOO CAN AFFECT THE METHOD OF TREATMENT.
